

1 WEEK CRASH COURSE - GATE 2018

(11th to 16th December 2017)

1 week Crash course for GATE-2018 was organized from 11th December to 16th December for Chemical Engineering students. Important problems from subjects like Fluid mechanics, heat transfer, mass transfer, thermodynamics, process calculation, reaction engineering were solved by faculty members during the crash course. Online practice test were also conducted to make aware of interface and virtual calculator. Course was coordinated by Prof. L. V. Malade under the guidance of Prof. Dr. K. T. Jadhav, Head of department and with the help of faculty members of the departments.

Objectives:

1. To create awareness of GATE examination

To make aware to students type of questions asked in GATE examination.

2. Students should be able to attend online gate examination

Outcomes:

1. Students understand type of questions asked in GATE examination.

2. Students get exposure to interface used for GATE examination.
