Increase book assets which are recommended by respective teachers.
Please hire highly qualified or knowledgeable & experienced faculty with respect to that of subject.
Need to improve faculty management & overall management either.
Need to take actions on students complaints.
Need to take special meetings for boys too ...
Need to conduct atleast single out of town industrial visit in large scale industry

...

No any suggestions

Staff should have expertise.
Staff should communicate kindly.

Overall good experience

Good 👍

Yes

Nice teaching

Good experience

Nothing currently

Good learning experience

Good teaching

More practical knowledge

It's good

Need to improve

Nice

More Activities needed
More practical needed
industrial training activities

Change the college timing

No need of improvement

Teachers with industry experience would add great value to the teaching-learning process

Reduce theory submission load
Give practical based assessment and sufficient time to perform it

Take more practicals on languages

no suggession

Overall learning experience is very good in my institute

Give us the proper class rooms with projectors

just don't focus on favorite students focus on every student and give chance to everyone.

In architecture department there is no classroom for last year students ,

Yess good

To Explain topics with examples

Keep it up the right teaching process 😻

All is good

National and international student exchange programs are required at our prestigious institution.
Also there need to be compulsory internship for all final year student in their 8th semester.
Clubs and club activities need to be supported by management and there should be fund for clubs.

Practical session should be more interactive. Discussion should be done on what are the new things to be done in practical session,and implementation in the same session

Other activities should also be there

focus on pratical skills should be provided more

Give practical based knowledge to understand concept and teach industry requirements skills

Skills improving programs should be held in the institute

Yes improve

Currently there are no suggestions as the teaching and learning process is great

Excellent performance.

Organize more industrial visits in order to improve practical knowledge

Increase book assets which are recommended by respective teachers.

Make teaching two way interaction
Use the bettere graphic and visual media

1.Give revision regularly. 2.Give repetly not understand part.

Need to take action on students complaints

All good no suggestions

1. Allot mentors or guides for specific group of students classified according to slow,average, advanced students for each of their growth accordingly
2. Provide more of application based learning
3. Teachers should personally guide students according to their performance and should try to develop good interaction with students

Na

Overall Very good teaching learning experience

Use better graphics and visual media to engage students well.
Try to reach every student and ask for their doubts.
Make teaching a two way interaction.
Try to complete the syllabus.

Neutral

Teacher should be more interactive with students.

1) Should focus on skills not on the syllabus
2) Teachers should have a friendly behaviour with students so that students can ask their doubts without hesitating
3) Should give more time for programming rather than the theory subjects.

Architecture teachers are not kept for reading ppt

01.assignment witten work can be minimised 02.application based activities should be conducted for better understanding
03.to know activities conducted in college proper channel should be made

The institute should provide internship to all the students in the 8th semester. It should promote student exchange programs and field visits to all the students studying in the institute. My utmost suggestion to the institute will be to provide an alternative for the submission work as the current one is a waste of time, paper and money.

Overall it's good

There are good

Take Only one exam in semister

Produce notes and question bank after teaching

Some need to improve teaching

1.not any

W

More practically teaching is necessary, more than theory

Provide more opportunity in core industry

No

All faculties teaches us very well.

Syllabus is not thoroughly completed the teaching style should be improved sometimes teacher should check whether students our understanding or not instead of just running the syllabus and just to target the completion date of syllabus.Thank you!

More experimental teaching, rather than providing the ppt slides as notes provide some actual handwritten notes

1. Need Industrial Visits at least 2-3 in a single Semester
2. Need to use ICT tools to teach for illustrating the actual concept
3. Teachers should be give more preference for problems not only on theory which already include in lots of books which can be understood by self learning but not the problems are self learning things
